

06/19/09 - MARCILAN IN AMSTERDAM!

If you happen to be crossing the old Dutch town of Amsterdam next week for the international congress of DentoMaxilloFacial Radiology ([IADMFR](#)) make sure to attend our presentation on [Rai](#) on **Tuesday 30-June @ 2:15 p.m.** The co-founder of MARCILAN, Dr. Bassam Hassan will discuss the current status of MARCILAN and its future development path. A short discussion will ensue the presentation and the presenter will be available afterward to answer any further questions.

And if you have registered for the pre-congress course "CBCT exposed" and have survived the Dutch-cuisine themed lunch then feel free to join Bassam on this one hour presentation in the afternoon for *the current trends and developments in CBCT 3D imaging.* (**Sunday June,28 @ 2:00 PM in the main congress hall**).

And if you are feeling particularly brave and have survived till the end of the congress without a CBCT overdose then you might want to join Bassam again and

for the last time while he explains to you *why CBCT is both potentially useful and useless in detecting vertical root fractures in endodontically treated teeth.* (

**Wednesday July,1 @ 11:15 AM).**

We will be waiting for you so don't miss out!
